

GOGO Juice is teeming with microbiology and is essentially a pro-biotic for your soil and plants.

GOGO Juice combines the ‘catalytic’ power of the billions of beneficial bacteria along with the well documented benefits of applying kelp, seaweed, fish, humic acid and manure. Hence, you are not only feeding your plants with all the goodness of a wide range of organic nutrients, but you are also providing your soil with the “workers” (beneficial bacteria) that assist in breaking down the organic matter, maximising the nutrients available to your plants.

The resultant product provides a huge boost of the living microbiology necessary for your soil and plants to perform at their optimum level, increasing their ability to resist pest and disease and to withstand heat and frost stress.

Available now

Sizes:

1 litre concentrate RRP \$15.95

120ml concentrate RRP \$6.50

1 litre of concentrate makes up to 500 litres

The microbiology within GOGO Juice stimulates healthy plant growth and encourages root development.
